March **2024** Newsletter

Hello, Friend!

Have you ever heard of a slab backsplash?

March’s Z & Co. Monthly is here to keep you up to date on the latest in interior design! Enjoy a tour of a Cumming home, discover the key to pulling off a monochromatic look, and join the discussion on dining tables for an open-plan area!

Featured Project

North Georgia Rebuild | Cumming, GA

For this project, we took our clients’ existing home down to the studs and redesigned it exactly how they dreamed it to be, ensuring they would be able to use it for years to come. This is the definition of a perfectly designed forever home. There was not a single area in this home that went untouched…

What's Trending?

A slab backsplash is a single, continuous piece of material, often made from stone like marble, granite, or quartz. As opposed to tile, it has no seams or grout lines and creates a sleek and uninterrupted surface. This type of backsplash offers a modern, clean aesthetic and can make spaces appear larger and more cohesive due to the lack of visual breaks. Slab backsplashes are versatile in that they can continue up the wall and can, but don't have to, match your countertops.

Insider Tips

For a monochromatic look, texture is one of the most important things to consider to add depth and interest to a space. For example, pairing a smooth leather sofa with a plush, textured rug can enhance the visual appeal of your room. In addition, using materials with different finishes, like matte and glossy, can add subtle contrast within the same color palette. To further elevate the design, consider introducing elements like trim and moulding or patterned furnishings to keep the space lively and engaging.

Q&A: How do I choose a dining table for an open-plan area?

A: For an open-plan space, the dining table's shape can define the area and facilitate flow. A round or oval table softens the space and encourages movement, while a rectangular table can anchor the dining zone more formally. Typically, we suggest a corner space near windows and use lighting, like a statement pendant above, to visually separate the dining area from adjacent spaces.
